HORIZON SOFTWARE
ENABLED SOLUTIONS

Clearwater Digital

Horizon

Automated Threat Intelligence

Unlike other Threat Intelligence tools, XCred is a unique active password exploitation tool, only providing the client with 'Live' dark web and weak password exposure

Horizon

Map your entire cloud environment in a click, visualising immediate risks, violations or compromises
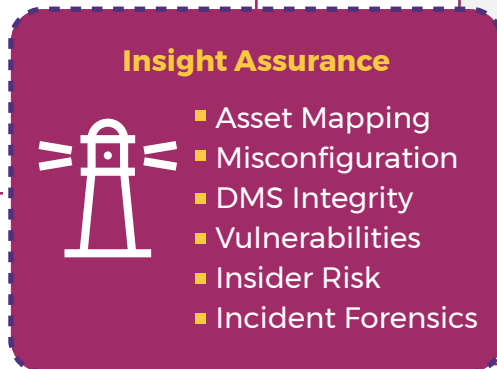

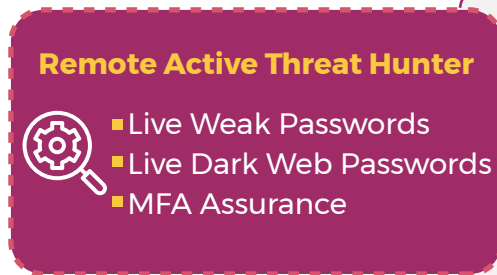

Insight

Enhance your risk knowledge through a deeper understanding of your Document Management System (DMS) activity, configuration issues and incident forensics

HOW IT WORKS?

Remote Active Threat Hunter

- Live Weak Passwords
- Live Dark Web Passwords
- MFA Assurance

Cloud Assurance *

Identify

Protect

Detect

Respond

Recover

Monitoring Operations Centre

- Monitoring
- Threat Hunting
- Threat Management
- Community Correlation

Client SaaS Application

Horizon

- Logs
- Operating Systems
- Software
- Auto Forwarding
- Risk Events
- Bad IPs
- Event Management

Enhance Analytics

Using advanced analytical tools we provide unique threat hunting and insights into our client's cloud Infrastructure; supported by our community intelligence updates

Insight Assurance

- Asset Mapping
- Misconfiguration
- DMS Integrity
- Vulnerabilities
- Insider Risk
- Incident Forensics

* The Horizon Software Enabled Solutions enhance and support key functions of the NIST assurance framework
